Program information is now available for the 4th International Conference on Traffic & Transport Psychology which will take place August 31 – September 4, 2008 in Washington DC, USA.

The conference will cover the latest research on the psychological factors in traffic and transport and how they impact road user behavior and safety issues. Key topics for discussion include:

- driver training and licensing
- driver impairment
- effects of fatigue
- characteristics of the aging driver
- perception and cognition
- road user attitudes and behavior
- road user needs across the lifespan
- enforcement and behavior change
- driver support systems
- the psychology of mobility and transport mode choice
- pedestrians, young drivers, older drivers and gender differences
- professional drivers
- motorcycles, mopeds, bicycles and rural issues
- visual perception
- safety belts
- social factors and policy

As with previous events in the series, the conference has attracted a large number of excellent symposia and more than 180 oral papers and 100 posters on the above topics. Oral presentations are arranged within five concurrent sessions over each of the conference days to supplement the following plenary keynote lectures:

What drives the driver? Surface tensions and hidden consensus
Ray Fuller, Trinity College Dublin, Ireland

Changes in brain structures of younger and older drivers: Meeting the challenge
Ian Glendon, Griffith University, Australia

Road use behavior in Africa
Karl Peltzer, Human Sciences Research Council of South Africa, South Africa

Integrating public health with traffic psychology
David Sleet, Centers for Disease Control & Prevention, USA

The challenge to transport psychology: How to get the world to burn less fossil fuel
Steve Stradling, Napier University, UK

Opportunities and new challenges for impacting transport safety among children, teens, and young adults

Flaura Winston, University of Pennsylvania, USA

The 4th International Conference on Traffic & Transport Psychology is organized by the Traffic & Transport Division (Division 13) of the International Association of Applied Psychology. Full program and registration information is available at www.ictp.com or from n.cosgrove@elsevier.com at the conference secretariat.
